Supplier Verification Checklist

Company and legal identity

- ☐ Business license matches supplier name, address, and bank details
- ☐ Export entity and invoicing party are clear
- ☐ Website, certificates, and sales claims are consistent

Engineering fit

- ☐ Supplier has reviewed drawings, specifications, tolerances, and standards
- ☐ Key material, coating, welding, curing, testing, or assembly requirements are confirmed
- ☐ Exceptions and assumptions are documented before price acceptance

Factory capability

- ☐ Workshop, equipment, molds, jigs, storage, and current workload are checked
- ☐ Production capacity fits project schedule and batch requirements
- ☐ Subcontracted processes are disclosed and controllable

QA/QC and documents

- ☐ Incoming material checks and traceability are visible
- ☐ Inspection records, test reports, and material certificates are available
- ☐ Hold points and acceptance criteria are agreed before production

Order and Shipment Release Checks

Commercial and delivery risk

- ☐ Deposit terms, payment milestones, and refund logic are documented
- ☐ Packaging, markings, loading method, and export documents are confirmed
- ☐ Delivery schedule includes realistic production and inspection time

Pre-shipment release

- ☐ Quantity, dimensions, finish, markings, and packaging are checked
- ☐ Photo evidence covers defects, corrections, labels, and critical details
- ☐ Shipment is released only after nonconformities are closed or accepted in writing

Information to send Source Rating

- ☐ Supplier name, website, contact, and factory location
- ☐ Product category, drawings/specs status, order stage, target country
- ☐ Your main concern: capability, certificate, quality, schedule, shipment, or communication
